Integrates with Platinum Data's premier AVM cascading solution

OptiVal™

Platinum Data's OptiVal is the industry's only platform that identifies the optimal AVM for each specified region, down to the county level – all automatically, and with 100% objectivity.

OptiVal is a unique back-end AVM testing platform that helps lenders comply with all regulatory and investor requirements, and achieve 100% preparedness for all levels of compliance audit. OptiVal works in just minutes, has all of the premier AVMs integrated, and can be used with as many or as few AVMs as your company designates.

Why Platinum Data?

- Largest independent AVM and cascade solutions provider
- 100% objective, with zero conflict of interest
- Choice of up to 18 of the premier AVMs in the industry
- Integrated with all major AVM providers
- Real-time AVM usage reports
- Consistent, standardized AVM processes and reporting

Platinum can provide AVM cascades consisting of any or all of the following:

- CA Value, Collateral Analytics
- HPA, Corelogic
- PASS, Corelogic
- PowerBASE6, Corelogic
- ValuePoint4, Corelogic
- CMV, DataQuick
- Freddie Mac HVE
- CASA, ISGN
- iAVM, Integrated Asset Services
